Another Mine Horror in the Pennaylvania Coal Region.

A Pillar Collapses Cotting Off the Miners from the Ventillated Parl of the Works.

ASULINI, PA., April 27.—The mining patch on the outskirts of town were thrilled with excitement this afternoon killed in the tunnel colliery. People left their homes at once, and men, women and children harried to the mouth of the shaft. There they were told that a pillar down is the mine had cullapsed, cutting nff tive men at least from the ventilated part of the mine, and they might be suffocated to death. Hrave men went to the relief of the imprisoned minnrs to dig them out of their underground prison. When the piller fell all avenue of escape was ent off. While the men were busy at work digging for the infortunates their work digging for the unfortunates their relatives in tears about the mino were bemonaulag their fato. Finally word was reseived above that the unfortunatea had been reached. The weeping people became silentin their engerness to know the worst. The announcement that the men had been sufficiented to death was received with load lamentations. Then uno by one the bodies were hoisted to the sarface in the cage. As the begrined hodies were identified by the stricken wives and little ones the scene was heart-tenching n the extreme. The victima are: Harry Gill, live boss, sged thirty live, married, leaves wife and four children; Michael Hohanna, aged twenty-six, wife and two small children; Harry Morson, aged thirty-five, just married a month; Daulel Finn, aged thirty-five years, leaves a wite and eight dangiders, the oldest fitteen rears; Ebenezer Francis, aged about thir ty, a foreigner, only in this country about six months, and had taken wnother man's place as substitute for to-day. THE RESERVOIR WAR.

Two Young Pariners With Ohl Guns Want lu Clean Duf the Milliary-The Stina-Cacus, C., April 25.- This morning two

reing farmers started out from Antwerp with old gave on their backs and with the Avowal of cleaning out the military, but were not heard from, and there is not the alightest danger that there will be any violent collision between the multury and the inhubitants. No more damage to the reservoir has been attempted, and all is quiet. The reservoit is believed by most residents to be a nifisance. The farmers along the border of the reservoir and the canal have been under water and their lands made wortidess for years, and they are ready to do most any thing to relieve the rondition of affairs. They have applied time and ugain to the State authoriies to do their duty in repairing the causi, but without effect. The news approach to success in the last Legislature made the failure all the more exasperating, and the farmers whose lands are damaged have lakea the law into their own hands. The two thousand seres which the reservoir covers would make the best land in the State, but besides this land, which would revert to the State, the condition of the reervoir makes worthiess nearly twentyfive thousand acres of private lands west of the reservoir. If it had been kept in ro pair and fresh water in it no one would avo objected, but no one has any taith that it will be done, and the don't want the curst under may circum-

Naming Eighty Persons. St. Louis, April 28. The grand jury that has for two weeks been investigating tho night raids of the Hald Kaobbers, completed their work yesterday, and handed fifteen more bills to Judge Hubbard, and were then discharged. The total number of indictments found by the jury is about 250, but not more than eighty persons are named in the charges. Some individuals are indicted in tour and live cases. The members of the jury all think that the Itald Kicoldiers are now under civil juris-diction and that no more black calico will be hought in Christoni County for the purpose of making masks. Every body scems to think that the reign of terror is over in this county. A prominent merchant of Sparta informed a citizewof Grark, to-day, that forty or lifty persons within his knowledge bad left the county since the grainl jury began its investigation.

log Manlac. Indianapolis, Inc., April 29,-Mrs. William Mantle, and estimable indy of this city, died last night under eirenmstances which have excited the deepest commiseration in her behalf, and great indignation against her husband. A few days ago the husband filed suit tor divorce, alleging that Mrs. Mantle had held illicit relations a well-known business man later with u demand against him for \$10,000 damegos, in applying for which Mantle expressly stipu-lated that whateverbenefit might accrue in a judgment against the defendant, it should be applied solely to the woman whom he had cast aside. Since the tirst sait was filed Mrs. Mantle has been greatly excited, and it was evident that she was rapidly losing her mind. Yesterday morning sho was found in the wood shed, where she had slept all night, and when she was taken into the house it was phin that her mind was gone. Last night some friends wero sitting up with her when sho sud-dealy fell from her chair and expired, having been stricken with paralysis, as a result of her intense mental excitement. Mantle learned of his wife's death this morning and became frantic from griet, Seizing a gun he started out to kill the man whom he charged with all his trouble, but was captured and a guard placed over him at his house. During the day he became violently insure, and could be kept quiet only by the use of opiates. When not under their influence ho is unmanage-able, several men being required to held him in bed. He liruly believes that the man was guilty of the acts charged, but it is generally thought that there was no foundation for his jealousy. A post-morten was hold on the remains of Mrs. Mantle to-day, upon the demand of the neighbors, but nothing was found to justify the suspicion of foul play upon the part of her husband. Her death was immediately caused by the bursting of a blood-vessel at the base of the brain, and this was, no loabt, caused by intense mea-

POLICE AND TRAMPS. A Pitched Ballie Hetween Them in East

Sr. Loris, May I .- For some time past the elty of East St. Louis has been in-fested with a lot of tramps and idle, wurthless fellows, who spent most their time peddling small articles which the pulice were satisfied were stolen. The tramps had a camp in the eastern outskirts of the city, and to-day, Chief of Police Walsh ordered it to be broken up and the trainps driven out of the city. Lieutenau Erwin, with fifteen officers, went to the comp this ferenoon and ordered the trumps tu disperse and leave the city. They paid no attention to the orders and the po-lice advanced to arrest them, firing two or three shots in the air to in timidate them. To the great sur prise of the police the tramps re turned the fire, but luckily without effect The police then charged the camp in force liring as they advanced and the tramps fit ed in all directions, some of them plunging into a slough near by and swimming for their lives. All of thom got outside of the eity and joined another camp, where the consolidated forces, defied the police The latter, having no authority out side the city, made no further efforts to arrest the fugitives but lett a strong guard on the apot to pre vent them from re-entering the city. PROGRESS AT WALTHAM.

The American Watch Company seem determined to maintain the prond position they have long occupied among manufacturers of pocket timepieces. During an interview the other day with a representative of Robbins & Appleton, he said: "We have a number of novelties that ought to be worthy of your attention, and in fact of the trade in general. During the year 1886, we have had a steadily-increasing demand for our better class of goods. This is owing to the very great improvements which have therein been accomplished. For instance, all the watches litted with our palent lireguet buir-spring have niel with special favor, because of the great amount of extra quality which this halr-spring imparts to the goods. The company seem to have pursued the policy of not increasing the quantity of their lowest-priced goods, but rather of pulting the better and medium grades at ligures which bring them within the reach of a very limited purse, and enable dealers with very limited capital to lay in an assorted stock of have justified the imposition of a long good-quality goods of great popularity. The Bartlett watch may be taken as an example. Here is a movement equipped | 18 not sufficiently condemued, the with all that can possibly be put into a watch to make it a thorough time-keeper, and its price is fabulously low. An English watchmaker recently took one of these Hartlett movements of the new model, examined it carefully, and quietly put it together with the remark:

movement is worth £9.' Yet it This "We have the watch, both in nickel frosting and raying, which never had been done before. These processes permit an almost endless variety of designs and patterns which adapt themseives beautifully to the shape of the watch-plate.

The chief novelty with which the company start out this year is their our-size watch—the smallest and thinnest, as well as the linest, ladies' watch ever made in this country. The diameter of its dial is just the size of a half-dollar piece. The train is made of gold; the jewel-settings likewise; and the jewels themselves are faultless rubies of the darkest color. The watch is thoroughly adjusted, and capable of the very linest time-keeping. Its price is very moderate—indeed, considering the ex-

tra line quality and superior linish, it is

wonderfully low. "Another novelty is the Waltham Minute Register Chronograph.' This watch is so constructed us to show by means of a diminutive dial-bit and special hand the minutes during which the long lifth-second hand revolves."

Here my informant exhibited the operation of the chronograph. The long lifth-second hand and the small special stones ranged in size from a pea to a fall-grown goose egg, some of the largest hand are normally stationary at 12, or weighing four ounces and measuring nine inches in circumference. Glass was are slarted, the small hand recording successive minutes up to ilfteen, any moment both hands may stopped, and another motion them back to zero. "This device is especially useful to sportsmen, scientists, physicians, engineers, machinists The same attachment is applied to the Waltham split-seconds chrono-graph, making it the most durable watch of the kind, imasunch as the mechanism is very simple and almost indestructible. The Waltham chronograph is made in the lirst place to be nu accurate time-keeper, built on the model of the company's linest 14-size watch. On top of this movement, and without complicating it, the chrono-graph attachment is fastened, thus clenrly exposing to view the entire chronograph apparatus. The plainest country watchmaker can take the attachment apart and set it together again without trouble. A Swiss watch-

maker recently remarked that nobody would have dreamed ten years ago that the Americans would ever be able to make any so-called complicated time keepers, and that they really do not that had the most exact and minute timekeeping on a much shapler construct lon. As a consequence, the American watch is more reliable, less costly to produce, and certainly without expense to keep in thorough-going order. "The company have added have added severn grades of six-size watches to their list, which they will be able to put on the market in the neighborhood of March

This will make eight different qualities of six-size movements, which, with the various cases-hunting and open-face, gold, silver and aluminine— with an almost endless variety of ladies' watches, allord a range of choice from the cheapest limit at which a gold expected to the diamo studded watch for the millionaire's wife During the year 1886 we have added two new grades of sixteen-size watches. which really make that part of the assortment a surprising one. Sixteen-size watches of the Waltham pattern have always been considered a very dear watch to make; but it seems that the increase in the product has enabled the company to amplify the line by the addition of the Riverside grades. most satisfactory line of our goods is that of the patent dust-proof silver open-face enses, which are the most popular of the kind. For strength, slmplicity of construction and durability these cases stand unexcelled, and ever

A LENIENT VERDIOT.

An Assertion That the Jury in the Watt-Schwartz Case Erred, if at All, on the Side of Mercy to the Culprils. Commenting on the verdiet of lmprisonment for life pronounced by the ury against the prisoners on trial for

the murder of Express Messenger

Nichols, the Chicago Herald says: It was the lustant and unanlmous verdiet of the jury that tried Watt and Sehwartz that bolk were guilty of the atrocious murder of Kellogg Nichols. Such a conviction was forced, probably, upon the minds of most persons who followed the trial as reported in the newspapers. The verdict was imprisonment for life. If these men were guilty the death penalty might more properly have been pronounced upon them, for the killing of a brave man engaged in the faithful performance of a duty, defending his trust fearlessly and nggressively until stricken down by vulgar robbers whe, for protection, probably, from the consequences of their crime, became assassins, was not only an actrocious, it was also a despi-

term of imprisonment upon the offenders. The crime deepened into murder, assassins are not adequately punished, short of the glbbet. It is odd, then, that where there was such unanimity of conclusion as to the gullt of tho necused and a seutence which might be regarded as merciful under the circumstances, any sug-gestion should be offered that the punishment named by the jury is extreme. The prisoners are entitled to the usual review, but upon the finding of their gullt, a limiting generally conceded to accord with the fact, they are entitled to no consideration whatever. If guilty, they may thank their stars that the jury has been so lenient as to

give them a life sentence. The ease seems to have been fairly tried. The State was zealous and indefatigable. The defense was the strongest that could be made. It is highly improbable that the jury has erred. To seek sympathy for the prisoners while admitting their guilt is ridienlous. In the herrible crime there wasn't a single

tersonat Appearance of the Unfortunate Ittval of Elizabeth. Her complexion, though likened by Brantome to alahasiev and ivory, does not seem to have possessed the clearness and brilliancy which the comparlson implies; for Sir James Melville, though auxious to vindiente his Queen's claim to be considered "very levely" and "the fairest lady in her country," acknowledged that she was less "white" than Elizabeth. The brightlikened to stars and Chastelard to beaeons, has not been questioned; but their color is a point about which there ls less manimity, opinions varying between hazel and dark gray. As regards her hair, the discrepancy of contemporary authorities is even greater. Bruntomo and Ronsaul describe a wealth of golden hair, and this is to a certain extent confirmed by Sir James Melville, who, when called upon by Elizabeth to pronounce whether his Queen's hair was fairer than her own, answered that "the fairnes of them baith was not, their worst faltes," this, however, must be opposed the testimony of Nicholas White, who, writing to Ceeil in 1563, described the Queen as black haired. The explanation of this may possibly lie in Mary's compliance with the fashion, introduced about this time, of wearing wigs. Indeed. Knollys informed White that she wore "hair of sundry colors," and, in a letter to Ceeil, praised the skill with which Mary Seton-"the finest busker of hair to be seen in any country"-did set such a curled hair upon the Queen, that was said to be a perewyke, that showed very delicately."

According to one account, the Queon of Scots wore black, according to another, auburn ringlets on the morning of her execution. Hoth, however, agree In this, that when the false covering fell she "appeared as gay as if she had

been sixty and ten years old."
Mary's hand was white, but not small, the long, tapering lingers mentioned by Brantome being, Indeed, a characteristic of some of her portraits. She was of tall stature, taller than Elizabeth, which made the Queen of England prononce her cousin to be too tall, she herself being, according to her own standard, "neither toe high nor too low." Her voice was Irresistibly soft and sweet. Not only does Brantome extol it as "tres douce et tres bonne." and Ronsard poetically celebrate it as capable of moving rocks and woods, but Knox, although ungraeiously and unwillingly, also testities to its charms. He- informs us that at one of her Parliaments the Queen made a "paynted orison," and that, on this occasion, "thair mucht have been hard among hir flatterias, 'Vox Dianæ! The voice of a goddess (for it could not be Dei) and not of a woman! God save the sweet face! Was thair ever oratour spack so properlie and ao sweetliel" - Gentleman's Magazine.

-I hear a good anecdote of a rural Congressman whom you would all recognize if I should tell his name, says a writer in the Philadelphia News One day he was seen, in hot haste temper, to rush bare-headed out of the house and across the street, then turn about and hasten toward the door ngain. The reduction of internal referitie and the taking of the revenue stamps from Proprietary Medicines, no doubt has isrgely benefitted the consumers, as well is regive henefitted the consumers, as well as relieving the burden of home mannfactures. Essecially is this the case with Oreen's August Flower and Boschee's German Syrup, as the reduction of thirty six cents per dozen, has been added to increase the size of the bottles contailing these remedies, thereby giving one-fifth more medicille in the 75 cent size. The August Flower for Dyspensia and Liver Complaint, and the German Syrup for Coupling the dark the derman for the world.
